

Design Engineer	Research and Development	DGCA Type Certification	Business development
-----------------	--------------------------	-------------------------	----------------------

Work Experience			
Aug ‘25 -Present		Lead R&D Engineer, Recnaile Pvt Ltd	
Responsibilities	Lead UAV R&D from concept definition to flight qualification, covering system architecture, aerodynamics, propulsion, and system integration. Provide technical leadership to multidisciplinary teams, ensure compliance with aerospace and defence standards, and contribute to business strategy through competitive analysis, technical proposals, customer engagement, feasibility studies, and successful transition of R&D innovations into scalable, market-ready UAV solutions.		
Milestone	Planned, reviewed, and achieved key program milestones including Preliminary and Critical Design Reviews, prototype realization, ground and flight testing, and regulatory clearances (DGCA, ETA-WPC, BIS), enabling transition to production-ready UAV systems in line with aerospace and defence standards.		
Oct ‘24 -Aug ‘25		Design Engineer, Parashar Future Defence Technologies Pvt Ltd	
Responsibilities	UAV Design Engineer in R&D, specializing in developing Kamikaze, Surveillance, and Logistics drones, along with a Dropper Mechanism. All projects adhere to MIL-STD regulations, ensuring high-performance, reliable, and mission-ready UAV systems for various operational applications, including defence, surveillance, and logistics.		
Milestone	Developing three UAVs—Kamikaze, Surveillance, and Logistics drones—along with a Dropper Mechanism in this period. while gaining expertise in FPV drone technology.		
Jan ‘24 - oct ‘24		Research and Development Engineer, Garuda Aerospace Pvt Ltd	
Responsibilities	I have experience working in the Research and Development Division, where I specialized in UAV design and DGCA Type Certification. My projects included developing delivery drones, canister-dropping drones, seed ball-dropping drones, and washing drones. I also played a key role in obtaining Type Certification for agricultural drones, which enhanced my skills in design engineering and regulatory compliance.		
Milestone	Completed DGCA Type Certification for an agricultural drone and developed various drones for delivery, canister-dropping, and seed-planting.		
INTERNSHIP			
Sep ‘23 - Dec ‘23		Intern, Garuda Aerospace Pvt Ltd	
Responsibilities	During this period R&D department, I focused on UAV Design and Type Certification, aiding in the creation, validation, and compliance of UAV designs with safety and efficiency standards. Collaborating with engineering teams, I conducted Cad, Analysis and testing, enhancing my knowledge of aeronautical design and certification for reliable, market-ready UAV solutions.		
Feb ‘23 - Mar ‘23		Intern, Jet Aerospace Aviation Research Centre	
Responsibilities	During this period Gained technical knowledge and hands-on experience in UAV and glider design and development. Conducted research on drone components, including sensors, propulsion systems, and flight controllers. Collaborated with a team of engineers to develop custom software and hardware solutions.		
ACADEMIC QUALIFICATIONS			
Year	Degree	Institute	Percentage
2025	Masters of Engineering	Park College of Engineering and Technology, Coimbatore	89.90%
2024	Bachelor of Engineering	Park College of Engineering and Technology, Coimbatore	85.40%
2020	Class XII	Alagappa Model Higher Secondary School, Karaikudi	70.60%
2018	Class X	C.V.CT.V Meenakshi Achi Matriculation School	81.09%
PROJECTS			
2024	Design and Development of Landmine Detection Drone we are Designed and tested avionics systems for a new unmanned aerial vehicle (UAV) platform.		
2024	Canister Dropping Drone Led development of a precise, safe, and efficient canister-dropping drone for law enforcement, ensuring effective tear gas dispersal and compliance.		
2023	Ambulance and Rescue Aircraft led a multidisciplinary team to design and integrate medical systems in rescue aircraft in Theoretical.		
CERTIFICATIONS			
2025	Fusion 360 Udemy		
2024	Solid works Udemy		
Skills			
Solid works, Fusion 360 & Ansys		Prototype & Product Development	Technical Certification
Ardupilot & Betaflight		Business Development	Drone Pilot
